

EMC RecoverPoint Operations and Management

This three-day course prepares you to configure and operate EMC RecoverPoint, even in complex multi-vendor/multi-site SAN environments.

Audience

Any storage professional who needs to deploy and manage EMC RecoverPoint on Continuous Data Protection (CDP), Continuous Remote Replication (CRR) and Continuous Local and remote Replication appliances. Requires working knowledge of multi-vendor, multi-site SAN configuration and management.

Topics

- The RecoverPoint platform
 - Design principles
 - Architecture principles
- Continuous Data Protection (CDP) configuration & operations
- Continuous Remote Replication (CRR) configuration & operations
- Continuous Local and Remote Replication (CLR) configuration & operations
- Advanced Configurations
 - SANTap
 - Cluster
- Multi-vendor environments
- Multi-site environments
- Consistency Groups
- Failover operations
- Failback operations
- Event notification
- Troubleshooting
